IN PERSON AND ONLINE

# International (Unilateral) Sanctions in a Multidisciplinary Perspective

## Legal, Economic-financial and Political Implications

*Unilateral restrictive measures, commonly referred to as "sanctions", by States or regional organisations have acquired an enormous practical importance, as confirmed also by the recent institution of a European Union's sanctioning mechanism. The matter is particularly complex, given its various implications from a legal as well as from an economic-financial point of view, but also in a political perspective, including such important questions as the concrete impact of sanctions, the expected results and those that are actually attained. The workshop does indeed adopt a multidisciplinary approach.*

**Coordinator**  
**Prof. Antonio Bultrini**  
Università di Firenze

**Thursday 9** 3 pm - 7 pm

### **PANEL 1 ► The Legal Aspects**

*Chair and discussant* **Prof. Mirko Sossai** | RomaTre University, Italy
